He/Him • Vijaynagar, Indore, MP • 09399161638 • [ritikgalgate38@gmail.com](mailto:ritikgalgate38@gmail.com) • [linkedin.com/in/ritik-galgate-746437250](https://www.linkedin.com/in/ritik-galgate-746437250) • <https://ritik-git.github.io/portfolio/>

## Full Stack Developer

Dynamic and detail-oriented Full Stack Developer with a strong background in designing and implementing high-performance mobile and web applications. Proficient in a diverse array of technologies, including Microservices, Java, and React.js, with a proven track record of enhancing system efficiency and user engagement. Recognized for exceptional teamwork and a positive attitude, dedicated to delivering scalable and robust solutions.

## WORK EXPERIENCE

### Mindcrew Technologies • Indore, MP • 04/2023 – Present

#### Full Stack Developer

- Designed and deployed high-performance mobile/web applications, optimized system efficiency, integrated robust RESTful APIs, and contributed to scalable full-stack solutions.
- Awarded Best Personality in Office for exceptional teamwork and fostering a collaborative work environment.
- Coordinated with cross-functional teams to implement dynamic features, ensuring timely and efficient project delivery.

### SolarHood Pvt Ltd • Indore • 11/2022 – 03/2023

SolarHood Pvt Ltd offers solar panels and installation services, driving demand through a responsive website.

#### Frontend Intern • Internship

- Developed and maintained a responsive website by leveraging **React.js**, **Redux**, **Material-UI (MUI)**, and **Bootstrap**, resulting in a 12% improvement in performance and enhanced user interaction on mobile devices.
- Transformed website performance by debugging, ensuring cross-browser compatibility, and implementing responsive web design, leading to a 20% increase in load time efficiency.

## EDUCATION

### Bachelor of Technology in Computer Science

Shri Vaishnav Vidhyapeeth Vishwavidyalaya • Indore, MP • GPA: 7.4

## CERTIFICATIONS

### Completed a course on Spring Boot, Git, and microservices. • 08/2024 – Present

Udemy (Telusko)

**Completed a MERN Full-stack Course** • 12/2022 - 04/2023

Anuj Kumar Sharma (CodingShuttle)

**Completed Data Structures and Algorithms in Java** • 11/2021 - 02/2022

Saurabh Shukla (MySirG.com)

## AWARDS & SCHOLARSHIPS

**The "Best Personality Award" at Mindcrew honors an individual who consistently uplifts the team with their positivity, collaboration, and inspiring presence.**

10/2023

Mindcrew Pvt Ltd

**Solved 100+ Data Structures and Algorithms problems on GeeksforGeeks and LeetCode, showcasing strong analytical and problem-solving abilities.**

LeetCode & GeeksforGeeks Practice

## PROJECTS

**Cuppa Lead** • 08/2024 - Present

Mindcrew Pvt Ltd

I used **React.js** to build a dynamic, component-driven frontend, ensuring seamless user interactions. For state management, I implemented **Recoil**, offering a scalable solution for both local and global state management. The user interface was developed using UI libraries like **Material-UI** and **Bootstrap**, enabling a responsive and consistent design.

**Salesforce API** was integrated for fetching and filtering leads, while **Mailgun API** facilitated the automated sending of personalized emails. Additionally, **Stripe** was integrated for secure payment processing. These technologies contributed to a robust, scalable, and efficient lead management, communication, and payment system.

**TeaLearn** • 08/2024 - 12/2024

Personal project

Developed a personal **eCommerce website** using **Java Spring Boot** and **Spring Security** for secure user authentication and authorization. Utilized **Spring Microservices** architecture for scalability and modularity, implementing **AOP** for cross-cutting concerns such as logging and transaction management. Integrated **MySQL** for efficient database management, ensuring seamless product management and order processing. This project showcased the ability to build a secure, scalable, and high-performance eCommerce solution.

**React Native Mobile App** • 01/2024 - 06/2024

Mindcrew Pvt Ltd

In the **Habitors** project, I developed a habit-tracking application using **FlutterFlow**, ensuring a user-friendly interface for tracking daily habits and progress. The application featured **Firestore Messaging** for real-time push notifications, helping users stay engaged with their goals. The project emphasized scalability, reliability, and a responsive design to cater to various devices. The use of **Firestore** as the backend allowed seamless data synchronization, while the app's intuitive layout provided users with a smooth experience for habit tracking and goal-setting.

## SKILLS

**Skills:** React, React Native, NEXT JS, Redux, Recoil JS, Java, Spring Boot, Stripe, Data Structures, Bootstrap, Firebase, MySQL, Git, UI Library, Typescript, Microservices, AWS, Docker, Microservices

**Interests:** Chess helps improve critical thinking, problem-solving, strategic planning, Gaming decision-making skills
